

Bioimmunex canis

Capsules for dogs to support immunity

Bioimmunex canis contains β -1,3/1,6-D-glucan (product obtained from *Saccharomyces cerevisiae* yeast). β -1,3/1,6-D-glucan is a natural, completely purified polysaccharide isolated from the cell walls of *Saccharomyces cerevisiae* yeasts. Beta-glucan strongly stimulates the immune system by the activation of macrophages, lymphocytes and neutrophils.

Macrophages play a basic role in anti-infective immunity, removing abnormal or dead cells and foreign substances from the body. Beta-glucan also enhances the effect of antibiotics, antifungal and antiparasitic agents. It accelerates tissue regeneration processes, reveals antitumour and antioxidant properties – it neutralises free radicals.

Remember about your pet – strengthen its immunity

Bioimmunex canis is recommended for dogs

- as prophylaxis, in order to support natural immunity of the body;
- to support treatment of infectious or neoplastic diseases, and during convalescence after a disease;
- in stressful situations (exhibitions, travel, changing the environment).

Method of administration: 1 capsule per 20 kg bw/day.

The capsule content can be mixed with some other food. With more capsules, the dose should be divided into 2-3 doses.

Capsule composition: β -1,3/1,6-D-glucan – 20 mg, excipients.

The advertisement features a blue background with a photograph of two dogs in a grassy field. One dog is lying down, and the other is sitting and holding a stick. In the top right corner, the Biowet Puławy logo is displayed. A brown rounded rectangle on the left contains the text "Let each dog acquire immunity". In the bottom right, a box of Bioimmunex canis is shown, with text in Polish: "Masa netto: 12,8 g (± 5%) (40 kapsulek po 0,32 g (± 5%))", "Bioimmunex canis", "Kapsulki dla psów wspomagające odporność organizmu", and "Karma uzupełniająca dla psów". The Biowet Puławy logo is also present at the bottom of the box.

Bioimmunex canis – supports natural immunity of the dog

Bioimmunex canis

Feed supplement for dogs (in capsules)

Beta-1,3/1,6-D-glucan 20 mg

Ingredients

Beta-1,3/1,6-D-glucan (derived from *Saccharomyces cerevisiae*), wheat starch, pork and beef gelatin (*capsule shell*), magnesium stearate.

Additives

Technological additives (anti-caking agents)

Microcrystalline cellulose (E 460) 204 402 mg/kg

Analytical constituents:

total protein 79.0 %, crude fat 0.5 %, crude fibre 12.7 %, crude ash 1.0 %

One capsule contains

Beta-1,3/1,6-D-glucan

Excipients

Properties and indications

Beta-1,3/1,6-D-glucan is a natural completely purified polysaccharide, isolated from the cellular walls of *Saccharomyces cerevisiae*. Beta-glucan strongly stimulates the immune system through activation of macrophages, lymphocytes and neutrophils. Macrophages play a basic role in anti-infectious immunity, in removal of abnormal or dead cells, as well as foreign bodies from the body.

Beta-glucan reinforces the effect of other preparations used in treatment (antibiotics, antifungal and antiparasitic agents), accelerates tissue regeneration, has anticancer properties and is an antioxidant – it neutralises free radicals.

Bioimmunex canis is recommended for dogs:

- as preventive measure in order to reinforce natural immunity;
- as support in treatment of infectious diseases, neoplasms, and in convalescence;
- in stressful situations (exhibitions, journeys, change of environment).

Posology

1 capsule per 20 kg b.w. / day

Capsule contents can be mixed with fodder. In the case of a larger number of capsules, it is recommended that the dose is divided into 2-3 times.

Storage

Store in a dry cool place.

Net weight: 353 mg

Pack size: 40 capsules

Shelf life

2 years

Veterinary approval number 06148301

For animal treatment only.
