

Bioimmunex felis

Capsules for cats to support immunity

Bioimmunex felis contains β -1,3/1,6-D-glucan (product obtained from *Saccharomyces cerevisiae* yeast).

β -1,3/1,6-D-glucan is a natural, completely purified polysaccharide isolated from the cell walls of *Saccharomyces cerevisiae* yeasts.

Beta-glucan strongly stimulates the immune system by the activation of macrophages, lymphocytes and neutrophils.

Macrophages play a basic role in anti-infective immunity, removing abnormal or dead cells and foreign substances from the body. Beta-glucan also enhances the effect of antibiotics, antifungal and antiparasitic agents. It accelerates tissue regeneration processes, reveals antitumour and antioxidant properties – it neutralises free radicals.

Remember about your cat – strengthen its immunity

Bioimmunex felis is recommended for cats

- as prophylaxis, in order to support natural immunity of the body;
- to support treatment of infectious or neoplastic diseases, and during convalescence after a disease;
- in stressful situations (exhibitions, travel, changing the environment).

Method of administration: 1 capsule per cat/day.

The capsule content can be mixed with some other food.

Capsule composition: β -1,3/1,6-D-glucan – 10 mg, excipients.

Capsules for cats to support immunity

Supplementary food for cats

Bioimmunex felis – supports natural immunity of the cat

Bioimmunex felis

Feed supplement for cats (in capsules)

Beta-1,3/1,6-D-glucan 10 mg

Ingredients:

Beta-1,3/1,6-D-glucan (derived from *Saccharomyces cerevisiae*), wheat starch, pork and beef gelatin (*capsule shell*), magnesium stearate

Additives

Technological additives (anti-caking agents)

Microcrystalline cellulose (E 460)	283 300 mg/kg
Colloidal silica (E 551b)	5 700 mg/kg

Analytical constituents:

total protein 79.0 %, crude fat 0.5 %, crude fibre 12.7 %, crude ash 1.0 %

One capsule contains

Beta-1,3/1,6-D-glucane – 10 mg

Excipients

Properties and indications

Beta-1,3/1,6-D-glucan is a natural completely purified polysaccharide, isolated from the cellular walls of *Saccharomyces cerevisiae*. Beta-glucan strongly stimulates the immune system through activation of macrophages, lymphocytes and neutrophils. Macrophages play a basic role in anti-infectious immunity, in removal of abnormal or dead cells as well as foreign bodies from the body.

Beta-glucan reinforces the effect of other preparations used in treatment (antibiotics, antifungal and antiparasitic agents), accelerates tissue regeneration, has anticancer properties and is an antioxidant – it neutralises free radicals.

Bioimmunex felis is recommended for cats:

- as a preventive measure to reinforce natural immunity;
- as support in treatment of infectious diseases, neoplasms, and in convalescence;
- in stressful situations (exhibitions, journeys, change of environment).

Posology

1 capsule / day.

Capsule contents can be mixed with fodder.

Storage

Store in a dry cool place.

Net weight: 353 mg

Pack size: 40 capsules

Shelf life

2 years

Veterinary approval number: 06148301

For animal treatment only.
